Project Focus

- Create a chatbot that Alabama residents can use for health and medical information
- Ensure the information is provided quickly, accurately, and securely

Sprint Goals

Wrap up development

Last minute bugs were addressed, and development was wound down

Address sponsor requests

Project backlog was updated in accordance with sponsor requests

Complete documentation

Comprehensive documentation was made for future development teams

Major Accomplishments & Cybersecurity

Accomplishments

- Removed previous team's sprint about us and deliverables
- Added namespaced templates for routing isolation from Crowdsourcing App
- Created test cases

Cyber Security

- Cybersecurity team reported no issues
- Documented setup for Google Cloud HTTPS implementation

Sponsor Feedback

Our sponsor thinks the chatbot is working better and is interested in the test scripts created.

They added a few items to the backlog for the next group to start with:

- Remove Feedback box after feedback given
- Look into time outs when data returned is large
- Add an indicator of the search location
- County of request fix

What wasn’t completed

Natural Language Search

Use of AI to search conversations exceeded the scope of the sprint

Location Tracking Issue

A bug with location tracking was discovered late into development that we couldn’t address

Streamlined Analytics

Functionality is there, but ease of use for administrators could be improved

Lessons Learned

Documentation

- Sparse legacy documentation slows down initial development
- Detailed technical documentation should streamline future handovers

Managing Scope

- Preparing to ship a project is just as time consuming as building it
- Keeping the project focus in mind is key for deciding which features to keep

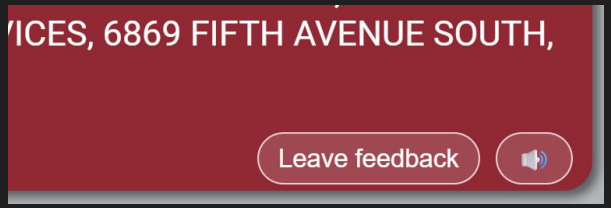
Accessibility Features

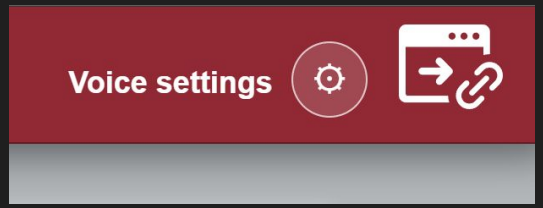
Text To Speech

For those with visual impairments there is a Text-to-Speech option with a replay button and settings to control the speed of the narration.

Speech To Text

For those who struggle with typing there is a Speech-to-Text option that allows users to converse their questions to the chatbot.





Backlogs

Todo 10 Estimate: 16 This item hasn't been started

1	Enhance logging to support evaulation for research and for identifying issues #4	Todo
2	Import CMS data into DB and update providers #2	Todo
3	implement https #3	Todo
4	Response quality #20	Todo
5	Ratings over time #21	Todo
6	Resource failure rate #23	Todo
7	Remove feedback box when done #33	Todo
8	Look into hangs/time outs when data to return is large #34	Todo
9	Add an indicator of the search location (especially when using location) #35	Todo
10	Fix county of requests #36	Todo

Backlogs

Done 23 Estimate: 112 This has been completed

11	Add feedback after question response #5	Done
12	Anticipate next questions #6	Done
13	Consider whether Gunicorn_conf.py is needed #1	Done
14	Fix Docker Issues #8	Done
15	Fix README.md formatting #9	Done
16	Completed admin.py updates #10	Done
17	Implement Location Tracking #12	Done
18	TTS and speech recognition #13	Done
19	Clean up codebase #14	Done
20	Security/medium fixes #16	
21	Implement XSS Security #18	
22	Comment analysis #19	
23	Feedback by county #22	
24	Update docker-compose.gcloud.yml #24	
25	Create .env-gcloud #25	Done
26	Create .env-gcloud-example #26	Done
27	UI Changes #27	Done
28	Data dashboard frontend #28	Done
29	Comment analysis #30	Done
30	Create FAQ.md #31	Done
31	Feature/chat tests #32	Done
32	Test Cases #37	Done
33	Create How to guide #38	Done

Team Contributions

Walt Wilber

- Development guide
- Finished Data Dashboard

Christian Meraz-Santiago

- Testing scripts
- Testing documentation

Willem Evanson

- Cloud deployment guide
- Unify page style using templates
- Finished Data dashboard

Matthew Davis

- FAQ's
- Google Cloud Maintenance

Sam Pope

- How to use guide for features
- Finished Comment Analysis
